Subject: OVEC decision - EPA Spreadsheets for 573 waters
Attachments: Draft Attachment 1_Bio impairments need TMDLs_06122017.xlsx; Draft Attachment 1_Delisted for Bio_06122017.xlsx; Draft Attachment 1_TMDLs dev for Bios_06122017.xlsx

Hi Mindy,

I'm forwarding the attached spreadsheets that contain more detailed information on the 573 waters included in EPA's OVEC decisions on June 13, 2017. These spreadsheets are a compilation of EPA's analysis of the streams and WV information sent in March and June. These spreadsheets are part of EPA's record for the June 13, 2017 decisions. The first spreadsheet will likely be of most use to you in developing the new TMDL schedule per the MOA. There are quite a few footnotes throughout the spreadsheet which provide further information and also mirror the EPA comments column. We noted where WV provided information that new assessments would likely lead to delisting or recategorization of various streams in the 2016 or 2018 lists. The last column has Attachment C or D to show where the streams landed in the MOA attachments.

Regarding your voicemail on two potentially missing streams that were included in Plaintiffs' Complaint. Plaintiffs removed two streams in the Second Amended Complaint. We included the following note within the footnotes at the bottom of the first spreadsheet:

Note: Plaintiffs' Second Amended Complaint removed the following waters from Appendix A: Crafts Run (WVM-4-A) in the Monongahela River Watershed at Line 68 in Appendix A and UNT/Robinson Run RM 4.09 (WVM-4-F) in the Monongahela River Watershed at Line 70.

Please let me know if there are any questions on the spreadsheets or if we can help in any way. You should also receive a hard copy of the decisions via regular mail. Thanks, Jen
